SUMMARY

Enthusiastic and self-motivated software developer with experience working in an agile team environment during the GA Tech bootcamp. Ready to transfer my skills and learn new skills to build valuable products that solve user problems.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL
Tools: React, Flask, HTML, CSS, Bootstrap, Node.js, Express API, GraphQL, MongoDB, Github, Heroku

PROJECTS

Python Mini Quiz

Deployed Site: https://daisha22d.github.io/py-quiz/

Github Repo:https://github.com/Daisha22d/py-quiz

● Description: a quiz app that tests users python knowledge with a few beginner friendly questions.

● My role: designed and developed this app using React and deployed on Github Pages

● Technologies: React, JSX, CSS, Github Pages

Robo Bot

Deployed Site: https://chatbot-00-eac25725f44b.herokuapp.com/

Github Repo: https://github.com/Daisha22d/probable-guacamole

● Description: an assistant bot that you can ask anything for help. Type a question and press send and the bot will reply. Refresh the page to clear the conversation.

● My role: designed and developed this app using Flask and deployed on Heroku. I used the OpenAI API.

● Technologies: Flask, Python, HTML, CSS, Heroku
